

To Whom It May Concern:

Robina Floors is pleased to announce our endorsement of the Schutz NA (North America) Family of Polyurethane High Performance Floor Finish Products.

The Schutz NA Polyurethane Floor Finishes have been approved by Robina Floors as the preferred floor finish for both our floating wood and laminate floors.

Schutz NA offers 3 different finishes; WaxNoMor, SlipNoMor and MarkNoMor. WaxNoMor and SlipNoMor are available in Matte, Satin, and Gloss. MarkNoMor provides exceptional stain resistance in addition to wear resistance making it ideal for auto showrooms, hair salons, institutional, educational, and healthcare environments that are challenged with staining and discoloration.

Floating Wood and Laminate floors make refinishing a challenge due to the normal movement and deflection associated with these types of floors, in addition, the durable, high-performance surface of our laminate floors historically has repelled any attempt to resurface with a new protective coating. Not only does the SchutzNA Family of products bond to Robina Floors floating wood and laminate floors, they flex and move while providing years of exceptional performance in heavy trafficked commercial environments.

In addition, MarkNoMor and SlipNoMor enables our product to meet the needs of the most challenging venues.

Detailed product information for all Schutz NA products are available online at www.schutzna.com. For specific guidance or assistance, call (877) 272-4889.

The entire family of SchutzNA products and Robina Floors' recommended floor cleaners may be purchased at www.robinafloors.com on the Robina Floors page using the link below.
