

No more yellowing from tires or rubber mats because of plasticizers!

Marknomor. For resilient flooring in car showrooms and offices.

Whether in the showroom or in the office area – the visual impression is perfect. But there's one thing that seems unavoidable: those ugly rubber marks from tires, chair-casters, furniture and rubber entrance mats.

They can jeopardize the whole positive impression. Because plasticizers have penetrated into the floor – and that kind of stain is impossible to remove.

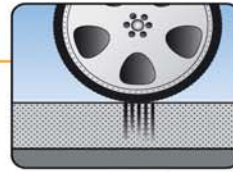

**Better not to use resilient floors?
Its time to change the way you think!**

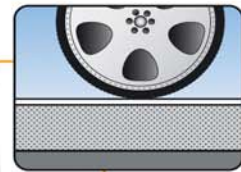

The appropriate solution: **Marknomor – for showrooms and office areas.**

- **protects floors against tire marks and other stains**
due to plasticizer resistance
- **effectively prevents friction damage**
and therefore increases the floor's lifetime of use
- **saves cleaning time and effort**
because repeated build-up of dirt is significantly reduced
- **always looks really good**
due to a robust protective film
- **guaranteed lowest possible business interruption**
compared with the costly replacement of floor coverings
- **quickly pays for itself**
by reducing cleaning costs

Without Marknomor plasticizers can easily penetrate into the floor covering.

The Marknomor sealing ensures that resistance is very high against plasticizers and other stains.

Continuously effective in regular use for:

Car dealerships, motorcycle showrooms, office rooms, hairdressing salons, hospitals, medical practices, nursing homes

Especially suitable for:

Vinyl & design floors,
linoleum & rubber floors

Most Important:

- builds resistance to the migration of plasticizers
(e.g. from tires or chair castors)
- saves costs on cleaning and maintenance, extends lifetime of use

The ideal protection for floor coverings in car showrooms and office rooms.
