

# WOOD AND LAMINATE FLOORS

Looks beautiful –  
extremely hard wearing

**WAXNOMOR**  
for wood and laminate floors.

These floors are something special – and are very fashionable, too. Even in heavily used areas, where endurance is expected, the floor can serve to unify and enhance an attractive

space. However, good looks can soon be ruined: by scratching and friction wear. Moreover, prohibitive costs means that frequent renovation is out of the question.

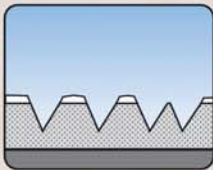

**Wood floors aren't suitable for areas that have to put up with intensive use by the public?  
Its time to change the way you think!**

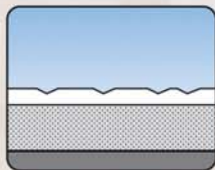

## The appropriate solution: **Waxnomor.**

- **provides higher long-term protection**  
compared with standard sealants
- **protects against friction wear and scratching**  
with its robust sealing film
- **extends the lifetime of floors**  
due to less cleaning necessity & reduced dirt accumulation
- **guaranteed non-slip and safe underfoot**  
also suitable for sports floors,  
in accordance with DIN 18032
- **makes a good overall impression,**  
looks well cared for in matte satin or gloss

Without Waxnomor. High wear and tear cause damages on the surface.

The Waxnomor protects the surface and makes it easy to clean.

### **Continuously effective in regular use for:**

Department stores, shops, offices, banks, administrative buildings, hospitals, medical practices, nursing homes, schools, kindergartens, sports and facilities, restaurants, hotels, car show rooms hairdressing salons etc.

### **Especially suitable for:**

Wood and laminate floors

### **Most Important:**

- protects against typical surface damage  
– for a long lifetime's use
- for every application, usable in all areas  
– including sports floors
- economical for maintenance

**Ideal for heavy traffic areas  
with its matte, satin and gloss finish.**
