Product-Information

Slipnomor Stripper

1. Product Description

Special stripping agent for cleaning and stripping newly installed or heavily soiled vinyl, linoleum and rubber floors. Removes the remains of old care products, stubborn and adhesive residue.

2. Areas of Application

Gentle in Vinyl, linoleum and rubber flooring. With low PH value, therefore particularly suitable for linoleum and rubber flooring.

3. Method of Application

Cleaning after installation:

Remove coarse dirt with a sweeping brush or vacuum cleaner. Dilute *Slipnomor Stripper* with water in a ratio of between 1:5 and 1:10. In case of particularly stubborn residues (e.g., in the commercial sector) use undiluted if required. For low levels of dirt adjust the strength of the solution as appropriate. Apply the cleaning solution to the floor area, distribute and allow to stand for approx. 10 minutes. Clean the floor surface using an automated scrubber, or scrubbing brush. Take up the loosened dirt a mop or shop vac. 

Mop the floor with clear water until completely clean.

Consumption: 1 Cont = 600 – 1000 ft².

Stripping:

Remove coarse dirt with a sweeping brush or vacuum cleaner. For domestic use, dilute *Slipnomor Stripper* in a ratio of 1:5 with water. In the commercial sector, use in concentrated form or diluted in a ratio of up to 1:3 (depending on the resistance of the protective film), spraying the floor with clear water before use if necessary. The method of procedure corresponds with that described in the previous paragraph the cleaning after installation, although it may be necessary to allow a standing time of 15-20 minutes.

Attention: Do not allow *Slipnomor Stripper* to dry out on the floor. For this reason, work in sections. Before stripping floor coverings (e.g., rubber flooring,) check for colour and material fastness at an inconspicuous spot. If necessary, dilute *Slipnomor Stripper* even more and apply several times using a short standing time.

Wear rubber gloves during use and ensure that the rooms to be treated are well ventilated. Do not spray sensitive surfaces (e.g., wood, metal, varnished surfaces) with the cleaning solution.

Slipnomor Stripper

Consumption: 1 Cont = 1600-2500 ft². (domestic use) and / or
1 Cont = 300 – 500 ft². (commercial use, undiluted)

4. Technical Data

pH-level: approx. 10.0 (concentrate)
Product code for cleaning and care products (Giscode): GG 20

Data on ingredients (EC recommendation): Less than 5% anionic surfactants, less than 5% non-ionic surfactants, less than 5% NTA, less than 5% phosphates. Other ingredients: Solvents, process materials and aromas. UBA 0210 0194

Slipnomor Stripper should be stored in a cool, dry place in its closed original container. Keep locked up and out of the reach of children.

5. Quality Inspection

Certified in Germany by Forschungs- und Prüfinstitut für Gebäudereinigungstechnik GmbH, Dettingen (FIGR). (Research and certification institute for the cleaning technique of buildings.)

6. Unit Sizes

1.3 Gal canister
